

Casemix Revenue Intelligence

Executive decision brief

Decision

Use DRG-based reimbursement as the negotiation anchor for complex acute activity.

A fixed per-diem structure creates material loss exposure that indexation alone does not repair.

Recommended actions

1. Define DRG-based pricing and explicit outlier protection.
2. Rank DRGs by absolute margin exposure before each fund negotiation.
3. Separate price, volume and casemix in monthly commercial reporting.
4. Validate contract rules with Finance, Clinical Costing and Health Funds.

Governance

Public national inputs are sourced from IHACPA, AIHW and APRA. Episode records and contract terms are synthetic. Results demonstrate analytical method and decision workflow; they are not actual hospital-group outcomes.
